

# Visioning & Ideation

*If you want to make positive, future-oriented change in your organization you'll need to go beyond writing long-winded paper visions and come to a shared agreement about what you are going to fight for together, and what steps you are going to take to get "there."*

DAVID SIBBET

---

## What's it all about?

Based on the Business Model Canvas this tool takes you onto the next stage after you have done an initial assessment of the building blocks of your business model. It encourages you to be expansive in your ideas and honest about the assumptions that underlie your business model. This process encourages you to expand your thinking and to then develop criteria to help you make choices about your priorities.

## What's it for?

The purpose of the model is to create a shared language for describing, visualising, assessing and changing business models. It is intended to be a practical guide, which will give you a deep insight into your future business model and generate shared understanding of the value your business creates.

## Using the tool

The main element of the tool is the business model canvas, which encourages you to take a holistic view of your organisation. You can print off the canvas attached, download a copy or create a large canvas with flip chart paper. As part of your process of creating your new business model it is suggested you use an ideation process (Osterwalder & Pigneur, 2010), which involves several steps and key questions:

Canvas block	Prompts
1. Team composition	<ul style="list-style-type: none"> <li>• Is your team sufficiently diverse to generate fresh business model ideas?</li> <li>• If you are a sole trader or micro-business, think about involving your friends, stakeholders or peers.</li> </ul>
2. Immersion	<ul style="list-style-type: none"> <li>• Which elements must you study in more depth before generating business model ideas?</li> <li>• This may be a long period of research or a few workshops.</li> </ul>
3. Expanding	<ul style="list-style-type: none"> <li>• What innovations can you imagine for each business model building block?</li> <li>• Generate as many ideas as possible, using all nine building blocks as a starting point.</li> </ul>
4. Criteria selection	<ul style="list-style-type: none"> <li>• What are the most important criteria for prioritising your business model ideas?</li> <li>• Having generated a lot of ideas, you now need to determine how you will select your preferred options.</li> </ul>
5. Prototyping	<ul style="list-style-type: none"> <li>• What does the complete business model for each shortlisted idea look like?</li> <li>• Try and move to a shortlist of 3 to 5 possible innovations. Use the business model canvas to sketch out and test each idea as a business model prototype.</li> </ul>

## What Next?

Take a really wild idea that you may have been harbouring for a while. Use the canvas to assess its potential as a new business model. Where are its strengths and weaknesses? Is it an idea that you might now pursue?

# Quick tips

- Work with a mixed group of stakeholders and use post-its, images, symbols and text to fill in your canvas
- Try not to rush the immersion stage but equally don't be paralysed by analysis
- Use the model intuitively and creatively
- Use the canvas to review other businesses in your sector. Consider where your new business model
